PROFESSIONAL SUMMARY

Python Django Developer with hands-on experience building production-grade Django applications, REST APIs, RBAC-based admin systems, workflow automation, and database-driven platforms. Worked across AI-assisted textile software, construction operations, and matrimonial/community platforms with focus on clean backend architecture, PostgreSQL/MySQL databases, client requirements, and scalable project delivery.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, REST APIs, Django ORM, authentication, RBAC

Databases: PostgreSQL, MySQL, SQLite, database modeling, query optimization basics

Frontend: HTML5, CSS3, JavaScript, Bootstrap, responsive UI integration

Libraries: Pillow, Pandas, NumPy, Matplotlib, Requests, BeautifulSoup, Tkinter

Tools: Git, GitHub, Postman, VS Code, deployment-ready project structuring

PROFESSIONAL EXPERIENCE

Python Django Developer | Brightcode Pvt Ltd, Ranchi | April 2026 - Present

- Led backend development for Kingjacq AI, an enterprise Jacquard design platform built with Django and AI-assisted sketch refinement workflows.
- Built subscription plans, payment flow logic, license/access control, and export workflows for managed production use.
- Designed Django models, REST APIs, and PostgreSQL-backed modules for scalable admin and user workflows.
- Worked directly with clients to convert business requirements into reliable Django-based technical solutions.

Python Intern | Codezeal Pvt Ltd | August 2025 - February 2026

- Developed 5+ websites, admin panels, and CMS modules using Django with MySQL and SQLite databases.
- Implemented backend features, API integrations, and dashboard workflows to improve application functionality.
- Used Git/GitHub, code reviews, and structured development practices while working on client-facing projects.

SELECTED PROJECTS

Kingjacq AI | Lead Backend | 2026 | Python, Django, AI, Textiles, Payments

- Enterprise-grade Jacquard design software that converts rough textile sketches into polished, production-ready patterns.
- Implemented AI-assisted sketch refinement, subscription plans, payment flow, license management, access control, and export workflows.
- Focused on design automation, backend stability, repeat-ready output handling, and a single production pipeline for designers.

SPD Infragroup | Full-stack | 2025 - 2026 | Django, DRF, PostgreSQL, RBAC, Reports

- Construction operations platform for BOQ-driven procurement, inventory tracking, and multi-role approvals.
- Built workflows for Admin, Store, Supervisor, and Engineer teams with purchase approvals, stock visibility, and expense reporting.
- Focused on RBAC control, BOQ workflows, stock tracking, and clean project operations reporting.

Covenant Matrimonial | Contributor | 2025 | Django, RBAC, Matching, Verification, Community

- Church-focused matrimonial platform with verified profiles, matching workflows, branch-level approvals, and lead management.
- Implemented modules for document verification, structured profile approval, community engagement, and premium service layers.

EDUCATION

Bachelor of Computer Applications (BCA) in FinTech & Artificial Intelligence | Amity University, Noida | Pursuing

Diploma in Computer Engineering | Government Polytechnic Khutri, Bokaro | 70% | 2022 - 2025
